

SECTION 01 23 00 - ALTERNATES

PART 1 - GENERAL

1.1 RELATED DOCUMENTS

- A. Drawings and general provisions of the Contract, including General Conditions and other Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- A. Section includes administrative and procedural requirements for alternates.

1.3 DEFINITIONS

- A. Alternate: An amount proposed by bidders and stated on the Bid Form for certain work defined in the bidding requirements that may be added to or deducted from the base bid amount if Owner decides to accept a corresponding change either in the amount of construction to be completed or in the products, materials, equipment, systems, or installation methods described in the Contract Documents.
 - 1. The cost or credit for each alternate is the net addition to or deduction from the Contract Sum to incorporate alternate into the Work. No other adjustments are made to the Contract Sum.
 - 2. Alternate prices shall be all inclusive of the cost of materials, work, overhead, profit, bonds, insurances, supervision, administration, time, and any and all other costs in connection therewith for work in place and accepted or omitted as the case may be, and shall hold for the same period as the Bid.
- B. Alternates are defined as alternate products, materials, equipment, systems, methods, units of work or major elements of the construction, which may, at Owner's option and under terms established by Instructions to Bidders and in the Contract or Agreement, be selected for the work in lieu of corresponding requirements of Contract Documents. Selection may occur prior to Contract Date, or may, by the Agreement, be deferred for possible selection at a subsequent date. Alternates may or may not change scope and general character of the work substantially. Requirements of this section may be related to, but must not be confused with, requirements of Contract Documents related to Unit Prices, Change Orders, Substitutions, and similar provisions.

1.4 PROCEDURES

- A. Coordination: Revise or adjust affected adjacent work as necessary to completely integrate work of the alternate into Project.
 - 1. Include as part of each alternate, miscellaneous devices, accessory objects, and similar items incidental to or required for a complete installation whether or not indicated as part of alternate.
 - 2. Each Alternate price filled in on the Bid Form shall include all costs of related coordination, modification or adjustment required due to any deviations from the Basis of Design or Base Bid product. Costs incurred by other Contractors to incorporate their work into the project due to deviations from the Basis of Design due to the Alternate Bid, shall be incorporated into the Alternate Bid price and will not be borne by the Owner for the Work of that Alternate.

- B. Notification: Immediately following award of the Contract, notify each party involved, in writing, of the status of each alternate. Indicate if alternates have been accepted, rejected, or deferred for later consideration. Include a complete description of negotiated revisions to alternates.
- C. Execute accepted alternates under the same conditions as other work of the Contract.

PART 2 - PRODUCTS (Not Used)

PART 3 - EXECUTION

3.1 SCHEDULE OF ALTERNATES

- A. General: The description herein for each alternate is recognized to be incomplete and abbreviated, but implies that each change must be complete for the scope of work affected. Refer to applicable Specification Sections (Divisions 02 through 33), and to applicable Drawings, for specific requirements of the work, regardless of whether references are so noted in description of each Alternate. It is recognized that descriptions of Alternates are primarily scope definitions, and do not necessarily detail full range of materials and processes needed to complete the work as required.
